Dear Theodore A. Wyka,

The Department of Energy's Complex 2030 Notice of Intent proposed action – to build more nuclear weapons – is dangerous and unnecessary.

- The U.S. cannot produce nuclear weapons while insisting other countries not pursue nuclear capabilities.
- The U.S. should meet its obligations under the Non-Proliferation Treaty to pursue disarmament.
- The U.S. should not waste billions of dollars planning and constructing new weapons manufacturing facilities. It should instead focus its resources on cleaning up its huge mess from past production.

Please add me to the Document Distribution List for the Draft EIS.
Stop the Bombplex! Clean Up, Don't Build Up!
